DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 7, 2004 has been entered.

Claims 3-36 are currently pending in this application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 36 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 36, it is recited "the group -Y-X- is -CH₂-CH₂-NH- or -C(R⁷)=C(R⁸)-N=", however, all the compounds listed are drawn to imidazoles and therefore, the recitation that '-Y-X- is -CH₂-CH₂-NH-' confusing and/or redundant.

Claim Rejections - 35 USC § 102

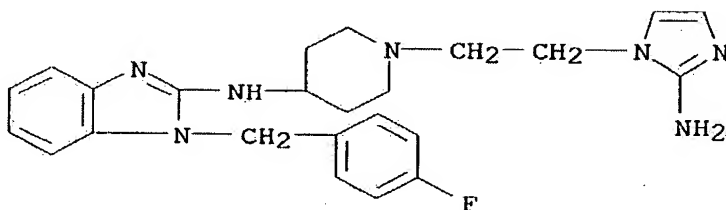

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35, 3-9, 14-18, 22-25 and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Janssens et al., U.S. Patent No. 4,588,722. The instant claims read on reference disclosed compounds, see formula (I) in col. 1 wherein L is Het-Alk- wherein Het is a radical of formula (c-4-c) and the corresponding compound no. 60 (col. 40, lines 36-38). The compounds are disclosed to be useful as pharmaceutical agents, see the abstract. The intended use recitation in claims 3-9, 14-18 and 22-25 is not given patentable weight.

The structural formula is depicted below for convenience:

N-[1-[2-(2-amino-1H-imidazol-1-yl)ethyl]-4-piperidinyl]-
1-[(4-fluorophenyl)methyl]-1H-benzimidazol-2-amine
monohydrate; mp. 171.4° C. (compound 60).

The above compound fits within the claimed compound of structural formula (I) wherein -Y-X- is -CH=CH-N=; n is 2; B¹ and B² are H; A is optionally substituted heterocyclic group.

The rejection was made in the previous office action and applicant indicated that 'all of the references disclose tetrahydroimidazole compounds and claim 35 does not include such

Art Unit: 1624

compounds'. However, contrary to applicant's arguments, the reference teaches 2-amino-imidazol-1-yl compound and therefore, the claims read on reference compound.

Allowable Subject Matter

Claims 10-13, 19-21 and 26-33 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
